EXPERIENCE

PURESOFTWARE | SOFTWARE ENGINEER - 2

Dec 2023 - Oct 2025 | Noida, India

- Worked on multiple parts of the Banking Tool on Arttha's Development team. Arttha (<https://www.arttha.com/>) is a Unified Fintech Platform.
- Built a consolidated notification-triggering framework that standardized pass and failure event handling, eliminating inconsistent per-flow configurations, and enabling a single, configurable notification workflow.
- Developed workflow-based Kafka topic architecture for notifications, enabling cleaner separation of concerns and necessitating coordinated multi-service code refactoring.
- Built modules for User Identity Management, like Customer Notifications and Preference Handling, Forget/Reset Password Workflows, User Role and Permissions, and Geolocation tracking.
- Built Sync and Async APIs, reviewing pull requests, code base refactoring, sprint planning, and contributing to design discussions.
- Mentored and onboarded juniors and new hires.
- Regularly participated in client calls for requirement gathering, clarifications, and progress updates.
- **Technologies:** Java 17, Java 11, SpringBoot, React, TypeScript, JUnit, Kafka, Postgres, AWS, PL/pgSQL, SonarQube

PURESOFTWARE | SOFTWARE ENGINEER - 1

Jan 2022 - Dec 2023 | Noida, India

- Worked on multiple parts of Banking Tool on Arttha's Deposits Backend team.
- Designed and implemented a configurable sweep-in/out module that automated savings on each credit transaction and introduced robust alerting for insufficient balance and successful operations.
- Building Sync and Async APIs, reviewing pull requests, code base refactoring, sprint planning, and contributing to design discussions.
- Built modules like Auto Debit Scheduler, Standing Instructions, CASA Accounts, Repayment Schedulers, Dormancy Scheduler, Lien Management for Deposits,
- Intrabank and Teller payments and Code Refactoring
- **Technologies:** Java 8, SpringBoot, JUnit, Postgres, PL/pgSQL, SonarQube

LUIT RENEWABLES | SOFTWARE ENGINEERING INTERN

Apr 2021 - May 2021 | Delhi, India

- Assisted in setting up structured development environments and backend deployment workflows.
- Worked with Linux-based systems and database configuration tasks.
- Supported frontend-backend integration testing.
- **Technologies:** Linux, JavaScript, PostgreSQL
